EDUCATION, ACHIEVEMENTS, & SKILLS

UNIVERSITY OF ILLINOIS URBANA-CHAMPAIGN | B.S. in Computer Science & Statistics | Expected May 2027
GPA: 3.8 / 4.0 | **Coursework:** Web Development, C/C++ & Python Program Design, Algorithms, Data Science, Statistics
Languages & Tools: React, React Native/Expo, JavaScript, HTML/CSS, TypeScript, Python, C++, C, R, Claude Code, GitHub Copilot, Git/GitHub, Figma, Jira, Storybook, Dovetail

EXPERIENCE

ABBVIE

Software Engineering Intern

May 2026 – August 2026

- Engineered custom React diagramming component for enterprise design system using Claude Code & Figma MCP, bridging design-to-code translation and enabling teams to dynamically & collaboratively render text-based diagrams
- Leveraged AI workflows to upgrade, test, and ship 7 core design system components, including dropdown filtering, dynamic color modes, and new component properties, directly impacting web and mobile interfaces used by 57,000+ employees
- Conducted a technical discovery evaluation for Storybook MCP integration using Claude Code, authoring a structured evaluation plan to assess documentation query accuracy & latency for an internal AI developer platform
- Synthesized user feedback on Dovetail from 5+ interviews into design system updates and technical communications
- Spearheaded an internal communication series to drive adoption of overlooked system features across development teams

DULCE TENTACIONES

Web Developer

June 2025 – July 2025

- Co-founded & engineered custom website from scratch for a local bakery using React, JavaScript, and HTML/CSS
- Integrated Brevo RESTful API for mailing list database management & automated, custom-styled marketing emails
- Connected Sanity headless Content Management System via its JavaScript client library, implementing dynamic content fetching for real-time menu updates, empowering non-technical owners to update menu items seamlessly

OSF HEALTHCARE

Product Design Intern

May 2024

- Engineered 7 high-fidelity Figma prototypes and data visualizations for a clinic feedback application, defining client-side survey interaction models and engaging data collection methods to gather patient feedback
- Mapped multi-user journey flows, defining conditional UI states and feature requirements to guide application architecture

PROJECTS

GOAT TOGETHER! [React Native/Expo, TypeScript, GitHub Copilot]

August 2026

- Engineered client-side architecture for a mobile application, establishing modular routing and component layouts
- Programmed 8+ dynamic SVG components (react-native-svg) and responsive UI layouts in React Native, leveraging theme props to render dynamic visual states across 12+ mobile views
- Utilized Figma-to-code workflows with GitHub Copilot & Figma API to translate UI designs directly into React Native

INTERACTIVE DATASET CLEANER & SQL TOOL [R, R Shiny, SQL, HTML/CSS, Tidyverse]

May 2026

- Engineered interactive web app enabling users to import, format, clean, and run SQL queries (sqldf) on structured datasets
- Designed preview-staging state architecture to inspect visual diffs and dimensions before committing data changes
- Implemented custom CSS styling alongside automated IQR outlier filtering and string normalization

ACTIVITIES

HACKILLINOIS

UI/UX Designer

July 2026 – Present

- Developed low-fidelity web and mobile registration interfaces in Figma, defining component layouts and user flows
- Co-created a centralized design system, establishing color tokens, typography, and component properties
- Analyzed survey feedback to map navigation paths and eliminate usability bottlenecks in registration flows

WOMEN IN COMPUTER SCIENCE (WiCS) AT UIC

UI Designer, Outreach Officer, Peer Mentor

May 2024 – August 2026

- Designed components & layouts in Figma for [WiCS website](#), ensuring a clean, accessible, and consistent visual experience
